

# TEBBEN 2

## BOAT TRAILERS

Tebben's unique roller arms pivot front, back, left and right. This four-way movement centers your boat and evenly distributes weight during transport. Dual-density rollers support and cushion the hull.

**OPTIONAL SWING-AWAY TONGUE.** Front Portion of tongue swings away to shorten your trailer and maximize your garage space.

**OPTIONAL GUIDE ROLLERS.** Assists you when driving on in current or wind.

## Roll on, roll off, with ease.

Your boat will load straight onto our roller trailers every time. Why? Because our roller arms tip back to front and side to side. Unlike trailers with arms that move only front to back, our four-way movement allows your hull to automatically center itself when loading and ensures a more even weight distribution when you pull it from the water. These special roller arms feature solid 3/4" bars to limit flex and dual density rubber rollers which are firm in the center but softer on the outside where they contact your boat's hull.

- Boats load straight
- Unique four-way movement from roller arms
- Dual density rubber rollers
- Available in four Series to fit boats up to 25' long.

## ROLLER TRAILERS

Model	Maximum Hull Length	Number of Rollers	Carrying Capacity	Tire Size
<b>R Series:</b>	Standard models, wide track rollers			
<b>R14-12</b>	To 14'	8	1200 lbs.	480x12B
<b>R16-15</b>	To 16'	8	1500 lbs.	530x12C

**OPTIONAL SPARE TIRE CARRIER.** Don't leave your boat beside the road because of a flat tire.

**OPTIONAL BRAKES.** Hydraulic Surge Disc Brakes are available on our trailers with 1500 lb. capacity and larger.
